EDUCATION

B.Tech, AI & Data Science
RMK Engineering College
2024 – 2028 (Expected)
CGPA: 8.01 / 10

SKILLS

Languages
Python, Java, JavaScript, SQL

Web & Backend
HTML, CSS, React, Spring Boot, REST APIs

Data & Databases
Oracle SQL, MySQL, Machine Learning (Basics)

Tools
Git, GitHub, VS Code, Maven

Core
Problem Solving, Data Structures

CERTIFICATIONS

Oracle AI Database SQL Certified Associate
Oracle University, Aug 2026

Oracle Agentic AI Certified Foundations Associate
Oracle University, Jul 2026

NPTEL Cloud Computing (Elite)
IIT Kharagpur, Jan-Apr 2026

NPTEL Geographic Information System
IIT Kharagpur, Jul-Oct 2025

Infosys Springboard (Aug 2025)
Java Programming Fundamentals
Java SE 8 Features
Java Language Features

LANGUAGES

Tamil, English, Malayalam

PROFILE SUMMARY

Pre-final-year B.Tech student in AI & Data Science with hands-on experience across web development, data science and full-stack projects. Built an adaptive placement training platform using Spring Boot and React, completed three industry internships, and hold Oracle SQL and Agentic AI certifications. Seeking a software development role to build reliable, user-centric products.

WORK EXPERIENCE

Data Science Intern | Thiranex
17 Jul 2026 – 16 Aug 2026 • Remote

- Completed a project-based data science internship, working with Python for data analysis and machine learning workflows.
- Delivered internship tasks through a structured GitHub repository. View repository

Web Development Intern | Micro Information Technology Services
Aug 2025 • 1-Month Internship Program

- Developed scalable, maintainable web solutions aligned with industry standards, writing clean and reusable code.
- Supported testing and deployment to ensure seamless delivery. View repository

Web Development Intern | ApexPlanet Software Pvt. Ltd.
Jun 2025 – Jul 2025 • Virtual Internship

- Engineered responsive web applications using HTML, CSS and JavaScript with efficient front-end development.
- Improved application quality through performance optimization and debugging. View repository

PROJECTS

CADENCE – Adaptive Placement Training Platform | GitHub
Spring Boot, React, MySQL, JWT, REST APIs

- Full-stack platform built around a weekly train–test–adjust cycle with company-wise interview rounds and JWT-secured, per-user test history.
- Integrated an in-browser Monaco code editor with Piston API execution and auto-verified test cases.

DIABET – Diabetes Prediction | GitHub
Python, Machine Learning

- Machine learning model that predicts diabetes risk from patient health parameters.

Phishing Website Detection | GitHub
Python, Machine Learning

- Classification model that identifies phishing websites from extracted URL and site features.
